

Team 5 – Sprint 1 Review

(Erik Rõigas, Shane Steelman, Than Ngoc)

What has been done:

- We created Trello.
- We wrote a project plan and product vision. Both documents were submitted in Moodle.
- Project repository and version control is set up.

What is in progress:

- Jenkins and docker setup
- UI Blueprint in Figma
- Relational model

Obstacles we faced:

- Lack of vision and bad instructions to know what to do.
- Time crunch due to external factors such as having to do a presentation in a different class
