Team 5 – Sprint 3 Review

(Erik Rõigas, Shane Steelman, Than Ngoc)

What has been done:

- Using github actions we made alternatives for the next:
    - Jenkins
    - Docker
    - JaCoCo report automation
- Continued developing the website
- Continued developing the backend

What is in progress:

- CarRental website itself
- Frontend to backend integration

Obstacles we faced:

- While creating the github actions we had difficulties setting it up. Various different issues but they were worked upon and fixed.
